Title: TippingPoint End of Life (EOL) dates.

Last Update: June 30, 2017

Summary: This Bulletin describes end-of-life (EOL) dates for TippingPoint devices and software. Customers with active maintenance contracts will continue to receive support from TippingPoint's Technical Assistance Center (TAC) through the end of the maintenance contract period. One-year maintenance renewal products will continue to be available for two years after the EOL/EOS announcement date.

End-of-Sale (EOS): EOS is the date at which a product will be removed from the price list and can no longer be ordered. Orders received prior to the EOS date may be fulfilled after the EOS date. Note that inventory balances may accelerate the End-of-Sale date prior to a previously announced date. In some cases, EOS may have effectively been met at an earlier date.

End-of-Engineering (EOE): The End-of-Engineering (EOE) date is the end of the period during which TippingPoint will support software releases with maintenance releases, bug fixes, workarounds, or patches for critical bugs. When software reaches the EOE date, it will no longer be actively maintained by the Engineering team.

End of Support (or End of Life): The EOS/EOL date is the date when all support (hardware and software) ceases.
